

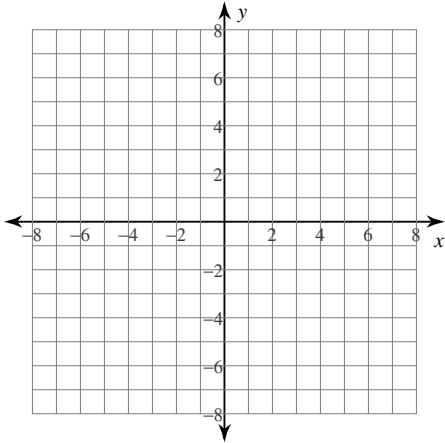

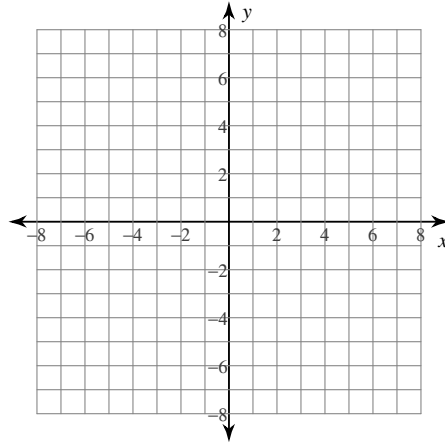

Graphing Ellipses Given the General Equation

Identify the center and vertices of each. Then sketch the graph.

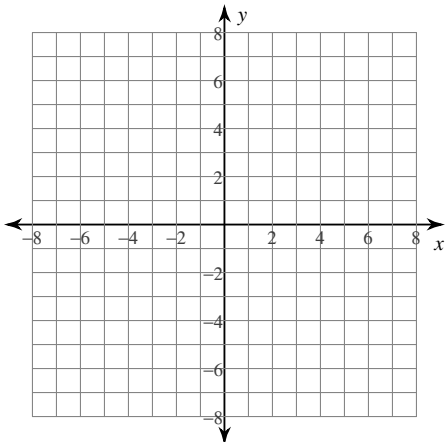

1) $16x^2 + 9y^2 - 128x + 54y + 193 = 0$

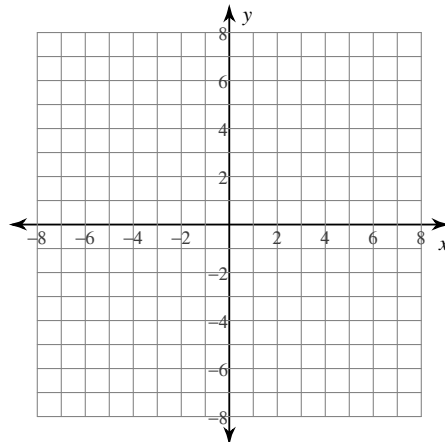

2) $49x^2 + 9y^2 - 98x - 392 = 0$

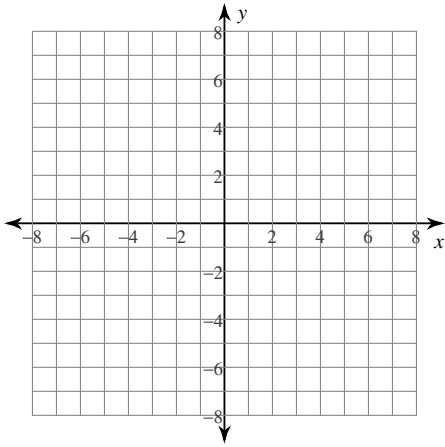

3) $4x^2 + y^2 - 32x - 2y + 29 = 0$

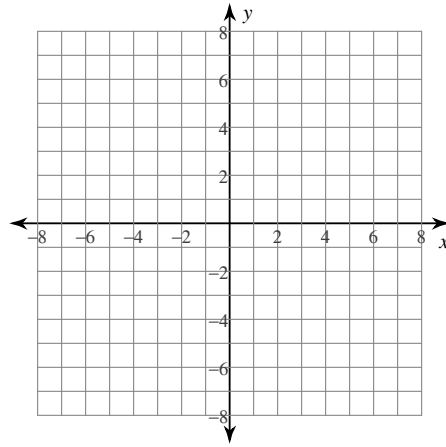

4) $16x^2 + y^2 + 32x = 0$

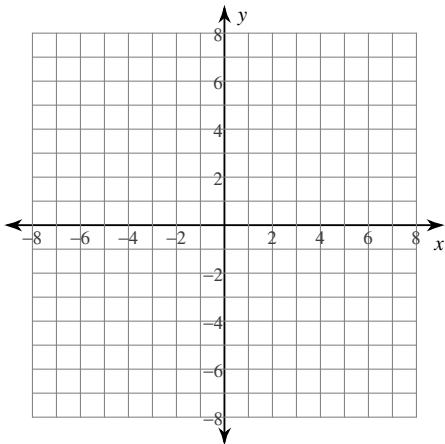

$$5) 5x^2 + 4y^2 - 20x - 16y - 64 = 0$$

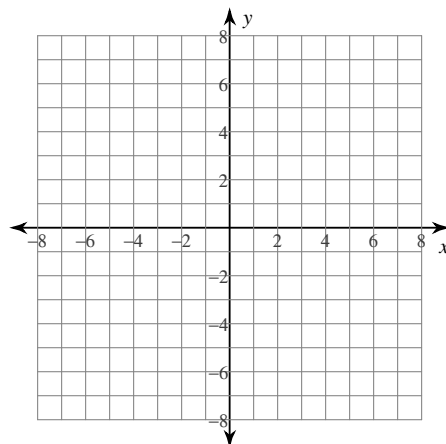

$$6) 25x^2 + 4y^2 - 200x - 8y + 304 = 0$$

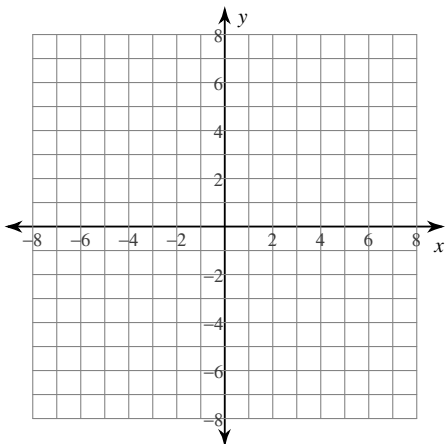

$$7) 4x^2 + y^2 + 24x - 4y + 36 = 0$$

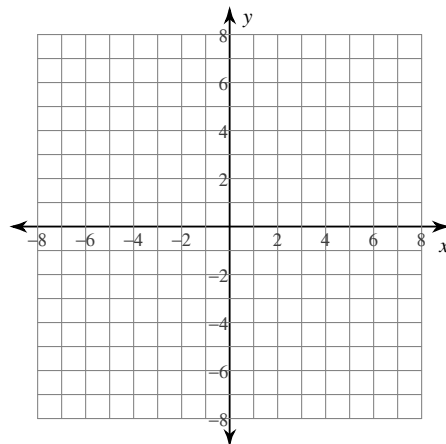

$$8) 36x^2 + 16y^2 + 180x - 128y + 337 = 0$$

$$9) x^2 + 16y^2 - 2x - 15 = 0$$

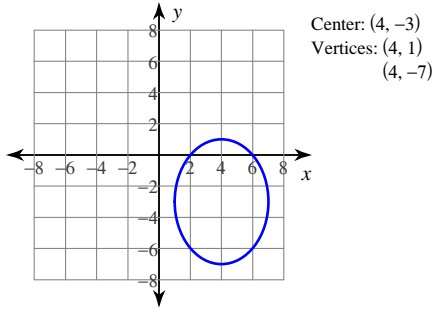

$$10) 9x^2 + 4y^2 - 36x + 8y - 104 = 0$$
