

Executive Summary

Q: A brief recap or highlights of the entire program review document. (500 words or less)

- Highlight major strengths and weakness.
- Highlight areas for improvement over the next 3-6 years.

Response:

The Student Health Center has not had the visibility it needs to serve a large number of students. Its current location, in the North Gym, is inadequate on many levels. We believe that moving to a new building in spring 2016, will bring a lot of positive change and awareness of the services offered. Staff plans to increase promotion, activities, and workshops for students.

In the last five years, the Student Health Center has built relationships with various on/off-campus departments and organizations. Many of the workshops and activities are conducted by our partners. Psychological services have increased as well, thanks to the partnership we have with Harbor College.

Unfortunately, just like other departments and programs on campus, the Student Health Center has difficulties with workshop attendance. Suggestions have been gathered and will continue to be gathered from various departments and partners, including the Health Advisory Committee, Kinesiology Department, Athletics, Nursing and Respiratory Care, counseling and others. One idea is to work with SSD to post videos on the website to make it less intimidating for students; some students might be too embarrassed to attend in person.

Participants

Q: Please indicate the individuals that participated in the completion of this program review.

Response:

Direct participants included Sonia Nodal, Dr. King, Carolina Moreno and Elizabeth Negrete. Information for this program review was also gathered through the Health Advisory Committee and the Office of Institutional Effectiveness.
