Q22 I would like to see the following corrected/improved before the course is offered to the next set of students (please describe if you have any suggestions).

Answered: 10 Skipped: 27

#	Responses	Date
1	MORE TUTORING HOURS	6/9/2014 2:12 PM
2	math work shops that everybody can attend in their own time because the time the workshops where held this spring i couldn't attend because of my other classes time	6/4/2014 8:41 AM
3	I would like to see students being more interacted with the teacher. This year the teacher only picked on a few and always picked on them because she was comfortable with them. If they did good she would congratulate them. But the ones that did not do good were invisible to the teacher giving the impression that she only cares for the ones that are actually succeeding in the class.	6/3/2014 10:44 AM
4	STEM IS AWESOME!!! Glad it's being offered!!! Keep it up!!	6/2/2014 5:24 PM
5	More application uses should be demonstrated during the lecture and tutoring times instead of only reading pre-made slides.	6/2/2014 4:54 PM
6	my professor has a very negative and discouraging way to talk to students when they do not understand the material.	5/21/2014 7:24 PM
7	more guided workshops giving students more direction on what to focus on...For testing also more guidance on specific areas to focus on for testing....possibly study guides? Maybe more homework assigned that will help guide students on areas to study as well as boost total points available	5/10/2014 2:42 PM
8	More enthusiasm displayed by councilors	5/10/2014 11:37 AM
9	Good as is	5/9/2014 8:58 PM
10	The counselor encharged should help more the students and give accurate information. Also he should learn how to treat students and not speak to them in a condesending tone.	5/9/2014 7:53 PM
