Partnering to build a brighter future.
The BuildLACCD program is responsible for oversight of the Los Angeles Community College District’s construction and campus improvement programs across nine campuses in the nation’s largest community college system. BuildLACCD is funded mainly by bonds approved by Los Angeles County voters in 2001, 2003 and 2008. Today, each campus features a variety of modern, eco-friendly and visually stunning buildings and facilities designed to foster student learning and education for the 21st century.

Bonds: 2001 (Proposition A: $1.245 billion), 2003 (Proposition AA: $980 million) and 2008 (Measure J: $3.5 billion).

611 Projects completed across nine campuses. Currently there are 52 projects in design, and 41 projects under construction.

$5.4b Dollars contracted by the BuildLACCD program to date.

45 LEED® Certified projects completed to date, including 37 at the LEED® Silver level or higher.
Building Student Success
For 77 years the Los Angeles Community College District (LACCD) has served as educator to more than three million students. Affordable, accessible and practical, LACCD offers learning opportunities to all communities in an 882-square-mile region. LACCD’s goal is to provide students, faculty, and staff with state-of-the-art facilities and learning environments that support excellence in education and prepare students and adults to succeed in creating and enhancing their life and career opportunities in the 21st century. Combined, the nine campuses serve students and adult learners in 40 cities throughout Los Angeles County and hosted a total student enrollment of more than 135,000 in 2015.

College Internship Program
The college internship program places students in meaningful internships with firms and contractors performing work on the BuildLACCD program. These internships reinforce academic pathways to careers in Science, Technology, Engineering, Art and Mathematics (STEAM), versus short-term job placement. The college internship program works in professional collaboration with industry partners to identify opportunities and provides students an avenue to engage, learn and pursue STEAM careers in architecture, engineering, construction, construction management, and information technology disciplines.

Fiscal Responsibility
The BuildLACCD program is subject to audits that implement vigorous efforts to ensure bond expenditures are made in strict conformity with the California Constitution. Oversight committees assist in the review of bond expenditures. These committees make sure that bond revenues are expended only for construction, reconstruction, rehabilitation or replacement of college facilities and that no bond revenues are expended for any teacher or administrative salaries or other college operating expenses.

Small Business
Small businesses are encouraged to participate in the Community Economic Development (CED) program. Created to increase involvement by local businesses, students, and workers to maximize the economic impact of the $6.2 billion build program, the CED program includes a comprehensive Local Worker Hiring Program (LWHP), Local, Small, Emerging, Disabled Veteran (LSEDV) program and college internship program.

Labor
LACCD entered into the Project Labor Agreement (PLA) with local building and construction unions in 2001 and amended it on July 8, 2015 (APLA). The PLA ensures labor cooperation across jobsites and established a uniform labor relations framework for labor and management during all construction.

Positioned to Move Students
Mobility and connectivity are crucial to a successful future. Los Angeles Community College campuses are positioned to take advantage of public rail and bus lines, and they offer students and adults the classes and facilities to put them on the right track for success.
