

**Los Angeles Valley College**  
**Course Level Student Learning Outcomes (SLO)**

**Course Name and Number:** Art 708

**Course Title:** Introduction to Ceramics

**Course Objectives:** (List the course objectives as they appear in the course outline of record.)

To create ceramic pieces using basic clay handling techniques.

Students will be able to apply and evaluate effectiveness of fabrication techniques while observing safe working methods at all stages of production.

*Establish 1–2 course level student learning outcomes and indicate how each SLO will be assessed.*

<b>Course Level Student Learning Outcome</b>	<b>Assessment Measure</b>
Students will be able to construct ceramic pieces.	Students will fabricate ceramic pieces by throwing, pinch-forming and hand-building. A rubric will be used to assess their ability to employ these construction techniques.
Students will be able to apply glazes to ceramic pieces.	Students will perform spraying, dipping, bulbing, slip-trailing and other glazing exercises. A rubric will be used to assess their proficiency of application of these techniques.
