

**Los Angeles Valley College
Course Level Student Learning Outcomes (SLO)**

Course Name and Number: History 86: Introduction to World Civilization I

Course Objectives: (List the course objectives as they appear in the course outline of record.)

1. Describe the origins and development of major world civilizations
2. Discuss major events and persons who made significant contributions to world civilizations
3. Differentiate between major intellectual and cultural trends
4. Describe contributions of the underclasses, eg. women, slaves, etc.
5. Evaluate an author's work according to accepted disciplinary criteria.
6. Assemble materials, organize and compose a report according to historical methodology.

Establish 1–2 course level student learning outcomes and indicate how each SLO will be assessed.

Course Level Student Learning Outcome	Assessment Measure
Student will be able to assess world history; and distinguish and differentiate what each of these civilizations contributed to the world village.	Quizzes, tests, examinations, projects measuring the student's ability to assess the developments, persons and variations involved in the development of world civilizations.
Student will be able to develop a process of critical thinking by researching issues, organizing material, marshalling opinion, and clearly demonstrating logical conclusions.	Analytical book reports, research projects, and other writing projects using accepted historical standards for measuring results.
