8. Examine the influence of ethics on nursing care.	
9. Interpret the Law as it relates to the Professional	

Establish 1-2 course level student outcomes and indicate how each SLO is assessed

Course Level Student Learning Outcome	Assessment Measure
<p>At the completion of this course the student will be able to: Perform the functions of a beginning nurse generalist as a provider, manager and coordinator of client care in various health care facilities.</p>	<p>Students are evaluated using a rubric to assess clinical skills. A score of Satisfactory or greater (0 to 2 +) on each of clinical objective criteria within the NS114 Clinical Evaluation Tool, and an overall score of Satisfactory or greater(0 to 2 +)upon completion of the course must be achieved. Records of students who receive less than satisfactory on any point of the rubric will be pulled for evaluation and analysis to assess for any trends.</p>
