**Date:** Tuesday, July 21, 2020 6:48:53 PM

---

Dear Monarchs,

I hope you all are remaining well this Summer. I know that the campus community continues to work hard serving our students and we certainly haven't seen the pandemic ease significantly. That said, we have been diligently planning and have some updates:

- **Spring 2020 Classes can resume on or after July 27** per the District Emergency Operations Center (EOC). While we don't have very many classes to complete for the Spring semester, I know it will be welcome news to many that we can get the classes completed. No specific resume date has been set for the classes, but we will get information out to instructors and students this week. We also are working on securing any additional PPE needed and posting additional signage.
- A new **Safety Advisory for checking into campuses** was issued by the EOC and can be found on the [District Safety Advisory page](#). Please take a few minutes to read through this Safety Advisory. We plan to implement the new procedures effective July 27<sup>th</sup>. Most of it is similar to the past procedures, except the following:
  - Prior approval to coming to campus will be enforced. You will need to be on the list prior to coming to campus.
  - An **online symptom check** must be completed prior to coming to campus and will be available on our homepage by Thursday, July 23.
  - Anyone visiting campus will need to check out as well.
- **Stage 3 plans** were submitted to EOC on Friday. Currently, all classes in the Fall 2020 schedule are online. However, we recognize that similar to the spring 2020 semester, some classes simply cannot be completed online. For these classes, we submitted what is referred to as a Stage 3 Recovery Plan to the District EOC. This plan is being reviewed. If approved, we hope to open these classes up soon for registration. Note that as of today, the Los Angeles County Department of Public Health (LACDPH) has indicated that we can resume classes per their guidance in June. However, this is subject to change at any time and we will make changes as required by new guidance and/or health orders.
- **Enrollments** for Summer remain strong, up 18 percent compared to last year. Fall enrollment comparisons remain difficult to assess given the changes to registration. However, we expect to have a better assessment of Fall enrollments in the next two weeks.

Thank you for your ongoing hard work in service of our students. A while back, I made a reference to the pandemic and response feeling like a marathon. Now, it might even feel like we are running an ultramarathon. Nonetheless, I know that together we will continue to be successful achieving our goals of equity, access, and success despite any obstacle.

Please let us know if you have any questions or if there is anything I can do to support you.

Be safe and be well,

Barry Gribbons
