The following rules apply for integer addition:

$(+) + (+) = (+)$	positive + positive = positive
$(-) + (-) = (-)$	negative + negative = negative
$(+) + (-)$ or $(-) + (+)$	subtract the "smaller" from the "larger" and take the sign of the "larger"

Examples

1)  $12 + 56 = 68$

2)  $-8 + (-12) = -20$

3)  $15 + (-6) = 9$

4)  $8 + (-25) = -17$

5) When adding more than two integers one can work from left to right:

$$\begin{aligned} & \underbrace{4 + (-2) + (-9)}_{= 2} + 13 \\ & = \underbrace{2 + (-9)}_{= -7} + 13 \\ & = -7 + 13 \\ & = 6 \end{aligned}$$

OR, one can add all the positive integers and all the negatives first:

$$\begin{aligned} & 4 + (-2) + (-9) + 13 \\ & = \underbrace{4 + 13}_{= 17} + \underbrace{(-2) + (-9)}_{= -11} \\ & = 17 + (-11) \\ & = 6 \end{aligned}$$
